Технические характеристики

Показан пример без декоративных элементов, точность технического описания не гарантируется.

Max. bay load	100
Max. section load	600
Carbon footprint (TM65 Basic Report)	1211 kgCO ₂ e
Масса:	54.068 кг
Ширина:	4425 мм
Глубина:	400 мм
Высота:	1200 мм

The stationary shelving is designed for storage and to optimise space utilisation. The shelving has a high load capacity and is suitable for use at an ambient temperature of -30°C. The louvred shelf, made from polymer, of the shelving norm 12 provides a ventilated, stable and hygienic storage surface.

The Hupfer Norm 12 stationary shelving is a lightweight structure made from a combination of aluminium and polymer. The shelving offers a clearly arranged and easily accessible storage solution for organised logistics.

The modular design allows for a needs-specific layout for a wide variety of spatial and temperature conditions, thereby ensuring the most efficient use of space. Uneven floors and temperatures from -30°C are no problem, even on a permanent basis. The shelving is easy to assemble and can be extended at any time in a straight line or even around corners and is easily adapted to changes in everyday logistics.

The easy-to-install, louvred shelf provides a ventilated, stable and very easy to clean shelf surface. It is even dishwasher safe. This shelf holds heavy loads despite its light weight.

The materials used are sustainable, 100% recyclable, and so valuable that Hupfer guarantees that it will buy back all of your shelving at the end of its useful life.

- solid polymer shelf with low weight ensures ventilated, safe and hygienic storage and keeps the stored goods in peak condition

Stationary shelving set norm 12 with louvred shelf

HUPFER
we make work flow

- high-quality polymer workmanship allows for easy cleaning and perfect hygiene. It is even dishwasher safe.
- modular system allows for any design and extension and ensures the most efficient use of space
- valuable materials ensure sustainability and value retention
- robust construction guarantees high stability and high load-bearing capacity
- modular system ensures easy handling from assembly to cleaning with little effort
